The teachers responsible for assets learning can make minor changes according to the kind of school and their needs, consulting with school administration. Elementary school teachers should prepare a list for each class every year. Teachers responsible should get assistance from school counsellor, class counsellors and all the teachers interested in assets learning during their studies.

In order to process assets learning concepts in an attention drawing way, it is possible to make use of the material from the assets learning studies part of the www.istmem.com website.

Our teacher can notify their suggestions to our directorate, comments and ideas about assets learning studies from the istmemdegerlereregitemi@gmail.com e-mail address.

İmam Hatip Schools, while they can make use of this list, can also prepare a more detailed one suitable for their schools' and students' needs, which contains similar values.
